1.Opis funkcionalnosti

U okviru ove sekcije navedite detaljan opis funkcionalnosti u formi kratke priče ili kreirajte *use case* dijagram.

-Admin panel: Pristup administracionom delu sajta ima samo korisnik koji ima ulogu admin. Služi da administratoru olakša manipulaciju sadržajem sajta kao što su:

Dodavanje, brisanje, editovanje: korisnika, proizvoda, anketa i strana(dodavanjem strane se nedobija nista zbog ruta i nepostojećeg koda za tu stranu)

Dodavanje, brisanje: saljdera, galerije

Postoji mogućnost da se odredi koja anketa je trenutno aktivna kao i koja slika se pojavljuje prva u saljderu.

Admin može da radi sve što i običan korisnik.

-Dinamički meni: Nalazi se na svakoj strani u header-u i izvlači se iz baze.

-Logovanje i zaštita sesijama: Logovanje se nalazi u gornjem desnom uglu i pristupa mu se klikom na button login. Provera se regularnim izrazima. Nakon uspešne provere prave se sesija sa prethodno pokupljenim podacima za usera. Sesija se briše kada se klikne na link Logout.

-Registracija: Korisnik popunjava svoje podatke a zatim se vrši provera prvo na korisničkoj a zatim i na serverskoj strani. Ukoliko je sve dobro popunjeno izaći će obaveštenje da je korisnik uspešno registrovan i da može da se uloguje.

-Anketa: Anketa se nalazi na stranici Author. Glasanje se zapisuje u bazu putem AJAX-a. Svi imaju pravo glasa, a u bazu se upisuju IP adrese. Glasanje je dozvoljeno samo jednom na svakom pitanju. U koliko pokuša da glasa više puta na istom izlazi obaveštenje koje mu kaže da nema pravo na to.

-Add to cart: Na stranici za svaki proizvod se nalazi dugme Add to cart. Ukoliko korisnik nije ulogovan odvešće ga na stranicu gde će moći da se uloguje ili registruje ukoliko nema nalog. Ukoliko je ulogovan i klikne na Add to cart podaci se preko AJAX-a upisuju u bazu i ispisuje se Product added. Takođe se u header-u pored korpe povećava broj porudžbina za jedan.

-Promena profilne slike: Nalazi se na stranici User profile . Svaki korisnik može da promeni svoju profilni sliku. Prvo odabere koju sliku hoće klikom na button browse i zatim klikne na button Change profile picture. Promena se obavlja preko php-a i zahteva refrešovanje stranice.

-Poništavanje porudžbina: Nalazi se na stranici User profile. Poništavanje se vrši preko AJAX-a .

Straničenje: Nalazi se na stranici All products .Prikazuje 6 proizvoda po stranici.

-Galerija: Nalazi se na stranici Gallery. Urađena je u lightbox-u. Iščtiva sve slike proizvoda iz baze.

Korišćeni jezici	<ul style="list-style-type: none"> • HTML 4 i HTML 5 • CSS • javaScript • JQuery • Ajax • PHP
Korišćeni HTML šabloni (framework-ci)	<p>Sopstveni template, pravljem koriscenjem klasa iz Bootstrapa.</p> <p>Template za admin panel skinut sa : https://github.com/puikinsh/sufee-admin-dashboard</p>

Napomena 1: Za neodgovarajući sadržaj informacija u prethodnoj tabeli student dobija -20 bodova.

Napomena 2: U okviru dokumentacije ne kopirati kodove framework-a kao i gotovih plugin-ova kao ni HTML, CSS i *javaScript* kod.

ISKLUČIVO KORISTI OVAJ ŠABLON ZA GENERISANJE DOKUMENTACIJE.

U SLUČAJU DA SE NE KORISTI OVAJ ŠABLON DOKUMENTACIJA NEĆE BITI PREGLEDANA TJ. SMATRAĆE SE DA STUDENT NIJE PREDAO DOKUMENTACIJU.

TEKST OZNAČEN CRVENIM SLOVIMA SLUŽI KAO UPUTSTVO I POMOĆ. U FINALNOJ VERZIJI POTREBNO UKLONITI OVAJ TEKST.

2. Skica struktura stranica

U okviru ove sekcije potrebno je navesti skice osnovnih tipova strana koje se koriste u okviru web sajta/aplikacije. Da bi kreirali skice možete koristiti alatku *Pencil* ili bilo koji drugi alat za kreiranje *wireframe*-a. Takođe moguće je odraditi i *print screen* strukture stranice.

3.MVC Organizacija

U slučaju da koristite MVC arhitekturu potrebno je da koristite sledeći šablon za prikaz pojedinih delova MVC arhitekture. Moraju se jasno navesti sva imena klasa, metoda zajedno sa parametrima. Nije potrebno crtati veze između MVC elemenata. Svaki drugi način predstavljanja elemenata MVC arhitekture biće kažnjen sa -10 bodova.
